

# REGENESYS SCHOOL OF AI

---

## PROGRAMME SERIES OVERVIEW

## LEADERSHIP SERIES

### Programme Overview

Regensys School of AI Executive Leadership Series is a premium suite of intensive, strategy-focused programmes (2–2.5 days) designed exclusively for Corporate and Public executives, board members, CHROs.

Each programme equips participants with the high-level frameworks, governance tools, and leadership capabilities required to drive enterprise-wide or institution-wide Gen AI transformation while ensuring ethical, responsible, and Africa-relevant implementation.

### Structure

This Leadership Series requires delegates to complete all core programmes before proceeding to the electives i.e. 2 core modules plus 1 or more electives.

Participants completing 3 programmes (2 core plus 1 elective) receive: Executive Certificate in AI Leadership.

Participants completing 4 programmes (2 core plus 2 electives) receive: Advanced Executive Certificate in AI Leadership

## MANAGERIAL SERIES

### Programme Overview

Regensys School of AI Managerial Series is a targeted suite of short, practical executive programmes designed specifically for functional leaders and managers.

Each programme delivers immediately applicable AI knowledge and hands-on experience tailored to a core business area.

### Structure

This Leadership Series requires delegates to complete all core programmes before proceeding to the electives i.e. 1 core module plus 2 or more electives.

Participants completing 3 programmes (1 core plus 2 electives) receive: Executive Certificate in AI Leadership.

Participants completing 4 programmes (1 core plus 3 electives) receive: Advanced Executive Certificate in AI Leadership

## TACTICAL SERIES

### Programme Overview

The Regensys School of AI Tactical Series combines foundational, applied, and advanced programmes into a comprehensive learning path designed for a wide range of participants from beginners to advanced professionals. This series covers essential AI concepts, practical machine learning techniques, and advanced topics such as agentic systems and AI ethics. Participants will gain digital fluency, architectural understanding, and technical depth through interactive virtual sessions, preparing them for responsible AI adoption and innovation across organisational and global contexts.

### Structure

This Tactical Series requires delegates to complete all core programmes before proceeding to the electives i.e. 3 core modules plus 1 or more elective

PROGRAMME NAME	MODULE	DATES	DURATION	DELIVERY MODE	COST
